Lainauksia

<http://attra.ncat.org/attra-pub/soilmgmt.html>

- "An acre of living topsoil contains approximately 900 pounds of earthworms, 2,400 pounds of fungi, 1,500 pounds of bacteria, 133 pounds of protozoa, 890 pounds of arthropods and algae, and even small mammals in some cases.(2) Therefore, the soil can be viewed as a living community rather than an inert body."
- "Any agricultural practice that creates and maintains bare ground is inherently less sustainable than practices that keep the ground covered throughout the year."
